## Panel Mounted 22mm Pushbuttons

Kuhnke Power Valves

### Miniature Oil Tight Pushbuttons (22mm)

Panel mounted 22mm pushbuttons are designed to fit along side standard industrial electrical pushbuttons to provide a uniform panel appearance and utilize the same drilling hole sizes and spacing. Additionally, items such as legend plates, lock off devices and other standard 22mm accessories can be used to blend air valves with electrical buttons on operator control panels.

This miniature line is available in 3/2 and 5/2 versions both standard and air pilot assisted. Operators include standard pushbuttons, mushroom heads, selector switches, key operators and wobble sticks.

Operators are cast metal, with a silver finish. Buttons are plastic. Valves are 1/8 ported and have an actuation force of 35 N for the standard types and 8 N for air pilot assisted types.

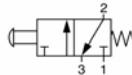

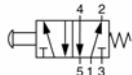

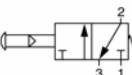

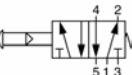

Miniature pushbutton valves utilize a bayonet mounting system that reduces installation time by eliminating loose washers, spacers and valve assembly. The pushbutton operator is inserted in the panel hole and attached to the valve body by turning the valve into place. 2 clamping screws are then tightened into the back of the panel to secure the unit in place.

### Red Pushbutton

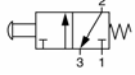

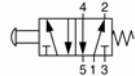

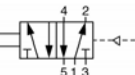

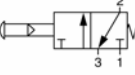

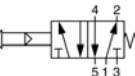

Standard raised red pushbutton for momentary actuation.
